Introduction

Paramount is a CMMI Level 3 and ISO 9001: 2015 certified IT solutions firm providing world-class technology and talent solutions in the government and private sectors. Established in 1997, Paramount is headquartered in Alpharetta, GA, with offices in the USA, Dubai, and India and influential partnerships in North America and the MENA region. The company's key clientele comprises large Federal and State agencies in the United States and enterprises across various industries including BSFI, Healthcare, Utilities and Technology.

Paramount's SMB services include cutting-edge technology committed to bringing value-driven transformative solutions for small and medium businesses for increased operational efficiency.

Paramount's product division began in 2017 with a mission to leverage innovative tech like Blockchain and AI to drive industrial and societal change by offering sustainability-focused products that balance human and environmental benefit with business value.

Why Paramount?

- ISO and CMMi certified
- Agile methodology that adapts heterogenous customer environments
- Affordable technology & technical resources that match customer needs
- Partnerships with global leaders, in IT infrastructure and content management systems
- Award-winning organization culture with very low attrition rates
- Flexible, cost-effective, high-value solutions for SMBs
- Key Staff - PM team members have an average of 10 years of experience and 8 years with our organization
- IT talent pool of 200 software developers, engineers, programmers, and project managers.

Key customers

Past Performance

Peer To Peer Energy Trading with EnerBlock LLC/King Electric Vehicles LLC: The development enabled a solar storage and blockchain energy trading solution that can be retrofitted to existing renewable energy systems. The system allows individuals to provide Residential Demand Response services to power grids without paying a third party, potentially generating additional revenues of \$0.15-\$0.25/kWh

Access Management for Cloud Virtual Infrastructure for a leading Agrochemical and Biotechnology Firm :

This project involved the design and execution of a turnkey access management solution for a cloud infrastructure platform that provides virtual desktops for enterprise users. The solution reduced access management request timelines from days to minutes, automating several validation and reporting functions.

Machine to Machine and IoT Connected Devices Platform Development for Amdocs.Inc :

This project allows US Cellular to open up possibilities for large customers who want to bring in and manage their M2M/IoT devices. The M2M connected device platform provides self-care management for M2M/IoT devices and seamlessly integrates with client billing systems.
